

Joint "bio-based composites" stand at COMPOSITES EUROPE 2017

COMPOSITES EUROPE – Facts & Figures

In cooperation with nova-Institute

The unique opportunity to efficiently present your bio-based solutions!

Date

19 - 21 September 2017

Location

Messe Stuttgart, Hall 6, Booth D50:

Fibres, Fibre Products, Intermediate and
Semi-finished Products

Held

Annually (since 2006),
from 2017 on annually in Stuttgart

Exhibitors

more than 400 exhibitors expected from around
30 countries

Topics

- Wood-Plastic Composites (WPC)
- Natural Fibre Composites (NFC)
- Bio-based thermoplastics and thermosets
for composites
- Bio-based plastics

Visitors

10,000 visitors expected from roughly 60 countries,
of which over 40 % international visitors from
e.g. the following sectors:

- Automotive

Joint "bio-based composites" stand

This year COMPOSITES EUROPE will be joining forces again with nova-Institut GmbH to arrange a joint stand devoted to "bio-based composites".

What are "bio-based composites"?

- All composite solutions with a reinforcement by natural, wood or cellulose fibres
- Bio-based thermoplastics and thermosets as matrix for glass and carbon fibres
- Fully bio-based composites with wood and natural fibres
- Bio-based plastics

Play a pioneering role as "bio-based composites" are being singled out and presented separately. The joint stand is located in hall 6.

Participation

All-in-one package

- Stand rent, stand construction
